

## Featured Project

### Landfill Projects

ArcSine Engineering has designed systems for facilities requiring programmable and hardwired controls, control of pumps and blowers, telemetry, package systems, gas monitoring, alarming, radio communications, electrical power systems, lighting, and electrical and power distribution master planning.

ArcSine Engineering is also experienced in design and instrumentation/control systems for landfill gas extraction and leachate handling facilities.

Our work includes Services During Construction consisting of submittal reviews, coordination with contractors, inspection, and assistance with startup.

Following is a partial list of ArcSine landfill projects:

- Anderson Landfill Leachate, Anderson, CA
- Benton Landfill, Redding, CA
- Black Butte Landfill, Mt. Shasta, CA
- City of Red Bluff Landfill Agency, Red Bluff, CA
- Eastern Regional Landfill, Truckee, CA
- Meadow Vista Landfill, Placerville, CA
- Tehama, City Landfill, Tehama, CA
- Tehama County Landfill, Red Bluff, CA
- Trinity County Transfer Station, Weaverville, CA
- Ukiah Landfill, Ukiah, CA
- Waste Management Transfer Station, San Leandro, CA
- Western Regional Landfill, Roseville, CA
- Yolo County Central Landfill, Woodland, CA
- Yreka Transfer Station, Yreka, CA
